

## **INDEPENDENT AUDITORS' REPORT**

THE SHAREHOLDERS,
ZYDUS WORLDWIDE DMCC,
DMCC, DUBAI - UNITED ARAB EMIRATES.

## **REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS**

## **OPINION**

We have audited the financial statements of **ZYDUS WORLDWIDE DMCC** (the Company), which comprise the Statement of Financial Position as at 31<sup>st</sup> March 2023, and the Statement of Comprehensive Income, the Statement of Changes in equity and the statement of Cash Flows for the year then ended and Notes to the Financial Statements including a summary of significant accounting policies and other explanatory notes.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31<sup>st</sup> March 2023 and its financial performance and its cash flows for the year then ended in accordance with Indian Accounting Standards (IND-AS).

## **BASIS FOR OPINION**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the United Arab Emirates, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **KEY AUDIT MATTERS**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Sr. No.	Key Audit Matters	Planned Procedure
1.	Assessment of impairment of intangible assets The Company's evaluation of impairment of intangible assets involves comparison of its recoverable amount to its carrying amount. The recoverable amount is determined based on value in use, which represents the present value of the estimated future cash flows expected to arise from the use of the asset group comprising each cash generating unit. There is a risk that the intangible assets will be impaired if these cash flows do not meet the company's expectations.  In addition to the significance of amounts involved, management's assessment process is complex as it involves significant judgement in determining the assumptions to be used to estimate the forecasted cashflows, principally relating to long term revenue growth rates, perpetual growth rate and the discount rate used.  Considering the materiality of amounts involved together with the inherent subjectivity related to principal assumptions, this has been considered as key audit matter.	The audit procedures performed by us included the following.  Evaluated the design and tested the operating effectiveness of the internal controls relating to review of impairment assessment process, including those over the forecast of future revenues, growth rate, terminal values and the selection of the appropriate discount rate.  Evaluated the reasonableness of the key estimates by comparing the forecasts to historical revenues, margins, growth rate etc  Evaluated the reasonableness of the valuation methodology, discount rate and perpetual growth rates used in the computation of value-in-use assessment.  Performed sensitivity analysis around the key estimates to ascertain the extent of change in those assumptions that either individually or collectively would be required for Intangible assets tested to be impaired.  Tested the mathematical and clerical accuracy of the model to conclude that the model is accurately calculating the value in use, using the appropriate methodology.

# RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Indian Accounting standard (IND-AS) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

## **AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guaranteed that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risk of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of the management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in auditor's report to the related disclosures in the financial statements or, if such disclosure is inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Opinion: In our opinion, to the best of information and according to the explanation given to us the company has, in all material respect, an adequate internal financial control system over financial reporting and such internal financial control over financial reporting were operating effectively as at March 31,2023.

## REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

We are not aware of any contraventions during the period of applicable law which may have a material effect on the financial position of the company and the results of its operations for the year then ended.

## Explanations:

- i In "Face Value [\*]", figures in US \$ unless stated otherwise.
- ii In "Nos. [\*\*]" figures of previous year are same unless stated in [ ].
- iii With effect from 01st July 2021, Zydus Discovery DMCC [ZDD], Dubai, a wholly owned subsidiary of the Company,is merged with Zydus Therapeutics Inc. [ZTI], USA, another wholly owned subsidiary of the Company. Pursuant to the merger, ZTI had acquired all the assets and liabilities of ZDD.

The merger is between the related parties and accounted for using accounting methodology of "Business Combinations under common control".

iv In consideration of the merger, ZTI had issued 3,000 shares of Series A non-convertible preferred stock of USD 210,000,000 [per share par value of \$ 0.001] and 3,000 common stock of USD 129,494,740 [per share par value of \$ 0.001]. The difference between the amount invested by the Company in ZDD and the consideration

received by the Company pursuant to merger had been accounted as Capital Reserve \$ 275,888,628

## Note: 29 : Financial Instruments:

## Fair value of instruments measured at amortised cost:

## **Financial Assets:**

The carrying amounts of trade receivables, loans and advances to related parties and other financial assets cash and cash equivalents are considered to be the approximately equal to the fair values.

Fair values of loans from banks, other financial liabilities and trade payables are considered to be approximately equal to the carrying values.

#### Note: 29 : Financial Instruments:

## B Risk Management:

The Company's activities expose it to market risk, liquidity risk and credit risk. This note explains the sources of risk which the entity is exposed to and how the entity manages the risk and the related impact in the financial statements. The Company's risk management is done in close co-ordination with the board of directors and focuses on actively securing the Company's short, medium and long-term cash flows by minimizing the exposure to volatile financial markets. The Company does not actively engage in the trading of financial assets for speculative purposes nor does it write options.

The most significant financial risks to which the Company is exposed are described below:

#### a Credit risk:

Credit risk arises from the possibility that counter party may not be able to settle its obligations as agreed. The Company is exposed to credit risk from loans and advances to related parties, trade receivables, and other financial assets. The Company periodically assesses the financial reliability of the counter party taking into account the financial condition, current economic trends, analysis of historical bad debts and ageing of accounts receivable. Individual customer limits are set accordingly.

- i Investments at Amortised Cost: They are strategic investments in the normal course of business of the company.
- ii Loans to related parties: They are given for business purposes. The Company reassesses the recoverability of loans periodically. Interest recoveries from these loans are regular and there is no event of defaults.
- iii Trade Receivables: The Company trades with recognized and credit worthy third parties. It is the Company's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an on-going basis with the result that the Company's exposure to credit losses is not significant.

## b Liquidity risk:

- a Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Due to the nature of the business, the Company maintains flexibility in funding by maintaining availability under committed facilities.
- Management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows. The Company takes into account the liquidity of the market in which it operates. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

#### Maturities of financial liabilities:

The tables below analyse the Company's financial liabilities into relevant maturity groupings based on their contractual maturities for all non-derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

	USD				
	< 1 year	1-2 year	2-3 year	> 3 years	Total
		As	s at March 31, 2	023	
Non-derivative Financial Liabilities:					
Borrowings [including current maturities and interest]	177,728,104	188,170,000			365,898,104
Trade payable	30,372,932				30,372,932
Total	208,101,036	188,170,000			396,271,036
	USD				
	< 1 year	1-2 year	2-3 year	> 3 years	Total
	As at March 31, 2022				
Non-derivative Financial Liabilities:					
Borrowings [including current maturities and interest]	114,171,259	219,970,000			334,141,259
Trade payable	21,734,570				21,734,570
Total	135,905,829	219,970,000			355,875,829

### c Foreign currency risk:

Foreign exchange risk arises from recognised assets and liabilities denominated in a currency that is not the Company's functional currency. The net open foreign currency exposures is insignificant considering the currency, volumes and operations of the Company.

REG NO. 5173

#### I-Company overview:

#### Description of Business:

Zydus Worldwide DMCC is formed as a company with Limited Liability and under the provisions of law no. (4) Of 2001 in respect of establishing Dubai Multi Commodities Center [DMCC], Dubai (U.A.E.) vide Registration no. DMCC5173, with Limited Liability. The company is licensed to perform activities such as - Pharmaceutical researches and studies, Marketing Management, Trading in pharmaceutical products (outside UAE), Investment in commercial enterprise and management, as per the licenses granted by DMCC vide License No. DMCC – 34079, 34080, 34081, 34082.

## II-Significant Accounting Policies:

A The following note provides list of the significant accounting policies adopted in the preparation of these financial statements. These policies have been consistently applied to all the years presented unless otherwise stated.

#### 1 Basis of preparation:

- A The financial statements of the Company are prepared under the historical cost convention on the "Accrual Concept" of accountancy in accordance with Indian Accounting Standards [Ind AS]
- B The financial statements have been prepared on historical cost basis, except for the following assets and liabilities which have been measured at fair values at the end of the reporting periods:
  - ii Certain financial assets and liabilities measured at fair value [refer accounting policy regarding financial instruments]
  - iii Defined benefit plans

#### 2 Use of Estimates:

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of income and expenses during the period. Application of accounting policies that require critical accounting estimates involving complex and subjective judgments are provided below. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statement in the period in which changes are made and if material, their effects are disclosed in the notes to the consolidated financial statements.

#### a Property Plant & Equipment

Property, plant and equipment represent a significant proportion of the asset base of the Company. The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life.

Management reviews the residual values, useful lives and methods of depreciation of property, plant and equipment at each reporting period end and any revision to these is recognised prospectively in current and future periods. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology.

#### b Impairment of assets and investments:

Significant judgment is involved in determining the estimated future cash flows from the investments, Property, plant and equipment to determine its value in use to assess whether there is any impairment in its carrying amount as reflected in the financials.

### c Employee benefits:

Significant judgments are involved in making judgments about the life expectancy, discounting rate, salary increase, etc. which significantly affect the working of the present value of future liabilities on account of employee benefits by way of defined benefit plans.

## 3 Property Plant & Equipment

- a Property Plant & Equipment are stated at historical cost less accumulated depreciation and impairment loss.
- b Cost of each asset is depreciated over the estimated useful lives on straight line method, based on useful lives as below:

Assets	Useful life
Building	60 Years
Furniture and Fixtures	10 Years
Plant & Equipments	5 Years
Office Equipment	5 Years

- c Where components of an asset are significant in value in relation to the total value of the asset as a whole, and they have substantially different economic lives as compared to principal item of the asset, they are recognised separately as independent items and are depreciated over their estimated economic useful lives.
- d Tangible fixed assets are depreciated over the estimated useful life which is periodically reviewed to ensure that the method and the period of depreciation are consistent with the expected pattern of economic benefit
- e Repairs and renewals are recoginsed in profit or loss when the expenditure incurred.

### 4 Impairment of Non Financial Assets:

The Property, Plant and Equipment and Intangible assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, the assets are grouped at the lowest levels for which there are separately identifiable cash flows which are largely independent of the cash inflows from other assets or groups of assets [cash generating units]. Non-financial assets other than Goodwill that suffered an impairment loss are reviewed for possible reversal of impairment at the end of each reporting period. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

#### 5 Employee Benefits

#### Short term Obligations:

Liabilities for wages and salaries, including leave encashment that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' service up to the end of the reporting perriod and are measured by the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current.

#### Long term employee benefit obligations:

The liabilities with regard to the Gratuity plan are dertermined by acturial valuation, performed by an independent actuary, at each balance sheet date using the projected unit credit method. Such costs are included in employee benefit expenses in the Statement of Profit and Loss. Re-measurement gains or losses arising from experience adjustements and changes in acturial assumptions are recognised immediately in the period in which they occur directly in "other comprehensive income" and are included in retained earnings in the statement of changes in equity and in the balance sheet. Re-measurements are not reclassified to profit or loss in subsequent periods. The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- i Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non routine settlements; and
- ii Net interest expense

#### 6 Revenue recognition:

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and is shown net of returns, trade allowances, rebates, value added taxes and volume discounts.

The specific recognition criteria described below must also be met before revenue is recognised.

#### a Sale of Goods:

Revenue from the sale of goods is recognized as revenue on the basis of customer contracts and the performance obligations contained therein.

Revenue is recognised at a point in time when the control of goods or services is transferred to a customer. Control lies with the customer if the customer can independently determine the use of and consume the benefit derived from a product or service. Revenues from product deliveries are recognised at a point in time based on an overall assessment of the existence of a right to payment, the allocation of ownership rights, the transfer of significant risks and rewards and acceptance by the customer.

The goods are often sold with volume discounts/ pricing incentives and customers have a right to return damaged or expired products. Revenue from sales is based on the price in the sales contracts, net of discounts. When a performance obligation is satisfied, Revenue is recognised with the amount of the transaction price [excluding estimates of variable consideration] that is allocated to that performance obligation. Historical experience, specific contractual terms and future expectations of sales returns are used to estimate and provide for damage or expiry claims. No element of financing is deemed present as the sales are made with the normal credit terms as per prevalent trade practice and credit policy followed by the Company.

#### b Interest Income:

For all debt instruments measured at amortised cost interest income is recorded using the effective interest rate [EIR]. EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses.

### c Other Income:

Other income is recognised when no significant uncertainty as to its determination or realisation exists.

## 7 Foreign Currency [Currency other than company's functional currency] Transactions:

Foreign currency transactions are recorded in USD at rate of exchange prevailing on the date of transactions. Foreign currency balances of monetary assets and liabilities are translated to USD at the rate of exchange prevailing at the date of the reporting date. Gains or losses on exchange are recognised in statement of profit and loss.

## 8 Provisions, Contingent Liabilities and Contingent Assets:

- a Provision is recognised when the Company has a present obligation as a result of past events and it is probable that the outflow of resources will be required to settle the obligation and in respect of which reliable estimates can be made. A disclosure for contingent liability is made when there is a possible obligation that may, but probably will not require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision/ disclosure is made. Provisions and contingencies are reviewed at each balance sheet date and adjusted to reflect the correct management estimates. Contingent assets are not recognised in the financial statements.
- b If the effect of the time of money is material, provisions are discounted using a current pre-tax rate that reflects , when appropriate, the risks specific to the liability

#### 9 Borrowing Cost:

- a Borrowing costs consists of Interest and other borrowing cost that are incurred in connection with the borrowing of the funds. Other borrowing costs include ancilliary charges at the time of acquisition of a financial liability, which is recognised as per EIR method. Borrowing costs also include exchange differences, if any, to the extent as an adjustment to the borrowing costs.
- b Borrowing costs that are directly attributable to the acquisition/ construction of a qualifying asset are capitalised as part of the cost of such assets, up to the date the assets are ready for their intended use.

#### 10 Intangible Assets:

- A Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.
- B Trade Marks, Technical Know-how Fees and other similar rights are amortised over their estimated useful life.
- C Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.
- D An item of intangible asset initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset [calculated as the difference between the net disposal proceeds and the carrying amount of the asset] is included in the Statement of profit and loss when the asset is derecognised.

#### 11 Research and Development Cost

- A Expenditure on research and development is charged to the Statement of Profit and Loss of the year in which it is incurred.
- B Capital expenditure on research and development is given the same treatment as Property, Plant and Equipment.

#### 12 Cash and Cash Equivalents:

Cash and Cash equivalents for the purpose of Cash Flow Statement comprise cash and cheques in hand, bank balances, demand deposits with banks where the original maturity is three months or less and other short term highly liquid investments.

#### 13 Financial Instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### A Financial Assets:

#### a Initial recognition and measurement:

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction cost that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place [regular way trades] are recognised on the settlement date, i.e., the date that the Company settles to purchase or sell the asset. However, trade receivables that do not contain a significant financing component are measured at transaction price.

#### b Subsequent measurement:

For purposes of subsequent measurement, financial assets are classified in five categories:

### i Debt instruments at amortised cost:

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held with an objective of collecting contractual cash flows
- Contractual terms of the asset give rise on specified dates to cash flows that are "solely payments of principal and interest" [SPPI] on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate [EIR] method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of profit and loss.

## ii Debt instruments at fair value through other comprehensive income [FVTOCI]:

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The asset is held with objectives of both collecting contractual cash flows and selling the financial assets
- The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value.
Fair value movements are recognized in the OCI. However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of Profit and Loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

## iii Debt instruments and derivatives at fair value through profit or loss [FVTPL]:

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI. Is classified as at FVTPL.

Instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

## iv Investments in subsidiaries:

Investments in subsidiaries are carried at cost less accumulated impairment losses, if any. Where an indication of impairment exists, the carrying amount of the investment is assessed and written down immediately to its recoverable amount.

### c Derecognition:

A financial asset [or, where applicable, a part of a financial asset] is primarily derecognised [i.e. removed from the Company's balance sheet] when:

- i The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either [a] the Company has transferred substantially all the risks and rewards of the asset, or [b] the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained. When the Company has transferred the risks and rewards of ownership of the financial asset, the same is derecognised.

#### 13 Financial Instruments:

#### B Financial Liabilities:

#### a Initial recognition and measurement:

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

#### b Subsequent measurement:

Subsequently all financial liabilities are measured at amortised cost, using EIR method, Gains and losses are recognised in Statement of profit and loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of profit and loss.

#### c Derecognition:

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of profit and loss.

#### 14 Going Concern:

The Financial Statements have been prepared on a going concern basis. The management made a review of the going concern assessment and considered the same. The 'management believes that, on the date of report, establishment has sufficient financial resources to meet the committed financial liabilities and therefore the financial statements for the current reporting period are prepared on a going concern basis.

#### 15 Earnings per Share:

Basic earnings per share are calculated by dividing the net profit or loss [excluding other comprehensive income] for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events such as bonus issue, bonus element in a right issue, shares split and reserve share splits [consolidation of shares] that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss [excluding other comprehensive income] for the year attributable to equity share holders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.
